HB-CS - SMOKE GRENADE, RUBBER BALL - CS SMOKE

DESCRIPTION

The HB-CS Grenades are designed to rapidly deliver a cloud of irritant agent with a discharge time of approximately 20 seconds. The jet action of the smoke emitting through the side ports makes it difficult for subjects to throw the grenade back at the officer. The grenade's emission ports are sealed to prevent the leakage of irritant agent until the grenade is discharged.

SPECIFICATIONS

Type	Hand Grenade, Continuous Discharge Smoke
Discharge	CS Irritant Smoke
Body Material	Rubber
Emission Ports	4
Diameter	76 mm Body
