MP-201-T / MP-201-T-SC PYROTECHNIC DELAY TRAINING FUZES

DESCRIPTION

The MP-201-T Flash Bang training fuzes are designed to provide a realistic device for use in training officers in the usage of Flash Bang devices in tactical situations. The training fuzes give a greater than 120db sound output at 1.5 meters. The fuzes have a blue lever to designate them as training fuzes.

Training Bodies and Reloads are available in standard rotation thread and also in reverse (left hand) threaded for use in reverse threaded training bodies. The M201A1 Type training fuzes are also available with a confidence/safety clip if your operational flash bang grenades are so equipped.
