MP-2FE-CS - FLAMELESS EXPULSION GRENADE - CS POWDER

DESCRIPTION

The MP-2FE series Flameless Expulsion grenades are effective for use indoors and for deploying irritant agent in high fire risk areas. The devices contain a CO² cylinder that is punctured after the 2 second fuze delay. The resulting rush of gas expels the micro pulverized CS Irritant Powder through the discharge port and into the air. The powder is instantaneously discharged, so there is no throwback risk.
