MP-781 - 40mm PRACTICE AMMUNITION

DESCRIPTION

The MP-781 cartridge is practice ammunition designed to be fired from M79 and M203 type 40mm Grenade Launchers. This round consists of a metal projectile body with a rotating band and a cartridge case assembly. A hollow plastic ogive is filled with a high visibility yellow-orange dye. The projectile has a range of up to 400 meters. Upon impact with the target the frangible ogive ruptures and releases the dye causing a puff of yellow-orange smoke which simulates explosive impact.
