BULK CHEMICALS, PELLETS & CAPSULES - CN, CS & OC

DESCRIPTION

Our NonLethal Technologies can provide CS and OC in raw chemical form, as compressed pellets or loaded in gelatin capsules. Bulk CS and OC powders can be supplied in raw form, or can be supplied blended with a flow agent to give the powder high flow characteristics and allow it to float suspended in the air as a fine dust. Pyrotechnic Pellets of CS and color smoke formulations can be produced in any size desired for your special applications. CS Capsules and pyrotechnic pellets are useful for training of personnel in the proper use of gas masks under actual exposure conditions.

SOME OF THE FORMULATIONS AVAILABLE

CS

Bulk raw powder
Bulk micro pulverized powder
Capsulated powder
Liquid formulations
Pyrotechnic Pellets

OC

Bulk raw powder
Bulk micro pulverized powder
Capsulated powder
Liquid formulations

CUSTOM BLENDS
