RP-32 - RUBBER PELLET GRENADE - (125 8mm BALLS)

DESCRIPTION

Our RP-32 Rubber Pellet Grenade is very effective impact munition for use in crowd control and many tactical situations. Once thrown or launched, the M201A1 fuse discharges after 2 seconds and causes the fuse assembly to separate from the grenade body. There is then an additional 0.5 second delay until the flash powder charge in the grenade detonates. On detonation the rubber body of the grenade ruptures and the 125 rubber pellets are propelled outward in a circular pattern. In addition to the effect this grenade has as an impact munition, there is also a flash bang effect on detonation.

SPECIFICATIONS

Type	Hand Grenade, Rubber Pellet
Body Material	Rubber
Projectile quantity	125 Rubber Balls
Projectile Diameter	8 mm
Hardness	85 durometer
Report	173dB + @ 1.5 meter
Diameter	76 mm Body
Fuze Type	M201A1
Fuze Delay	2.0 Seconds
Length Overall	132 mm
Overall Weight	290 grams

SHIPPING INFORMATION

UN Number	UN 0452
Shipping Name	Grenade, Practice
Hazard Class	1.4G
Quantity Per Package	9 Grenades in Heavy Wall Fiberboard Tubes
Packaging	Fiberboard Box, 4G UN/DoT Approved

WARNING

Device should not be thrown directly at personnel.
