· After swallowing:
  Unlikely route of exposure.
  Do not induce vomiting; immediately call for medical help.
· Most important symptoms and effects, both acute and delayed: Blast injury if mishandled.
· Danger: Danger of blast or crush-type injuries.
· Indication of any immediate medical attention and special treatment needed:
  Product may produce physical injury if mishandled. Treatment of these injuries should be based on the blast and compression effects.

5 Fire-fighting measures

· Extinguishing media
· Suitable extinguishing agents:
  DO NOT fight fire when fire reaches explosives.
  Flood area with water. If no water is available, carbon dioxide, dry chemical or earth may be used. If the fire reaches the cargo, withdraw and let fire burn.
· For safety reasons unsuitable extinguishing agents: None.
· Special hazards arising from the substance or mixture
  During heating or in case of fire poisonous gases are produced.
  Product may explode if burned in confined space. Individual cartridges may explode. Mass explosion of many cartridges at once is unlikely.
· Advice for firefighters
· Protective equipment:
  Wear self-contained respiratory protective device.
  Wear fully protective suit.
· Additional information:
  Eliminate all ignition sources if safe to do so.
  Cool endangered receptacles with water spray.
  Individual devices will randomly explode. Will not mass explode if multiple devices are involved. Burning material may produce toxic and irritating vapors. In unusual cases, shrapnel may be thrown from exploding devices under containment. See 2008 Emergency response Guidebook for further information.

6 Accidental release measures

· Personal precautions, protective equipment and emergency procedures:
  Wear protective equipment. Keep unprotected persons away.
  Remove persons from danger area.
  Ensure adequate ventilation.
  Protect from heat.
  Isolate area and prevent access.
· Environmental precautions:
  Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.
· Methods and material for containment and cleaning up:
  Pick up mechanically.
  Send for recovery or disposal in suitable receptacles.
