### 5 Fire-fighting measures

**· Extinguishing media****· Suitable extinguishing agents:**

DO NOT fight fire when fire reaches explosives.

Flood area with water. If no water is available, carbon dioxide, dry chemical or earth may be used. If the fire reaches the cargo, withdraw and let fire burn.

**· For safety reasons unsuitable extinguishing agents: None.****· Special hazards arising from the substance or mixture**

Fire or projection hazard.

Formation of toxic gases is possible during heating or in case of fire.

Eliminate all ignition sources if safe to do so.

Cool endangered receptacles with water spray.

Evacuate area and fight fire from from the upwind side.

Flammability Classification: (defined by 29 CFR 1910.1200) Explosive. Can explode under fire conditions.

Individual devices will randomly explode. Will not mass explode if multiple devices are involved. Burning

material may produce toxic and irritating vapors. In unusual cases, shrapnel may be thrown from

exploding devices under containment. See 2008 Emergency response Guidebook for further information.

### 6 Accidental release measures

**· Personal precautions, protective equipment and emergency procedures**

Use personal protective equipment as required.
